Objective

Front-End Developer seeking to join a professional team where I can contribute to building modern, high-quality web applications using React.js and Next.js, while continuously improving my skills, gaining real-world experience, and delivering Impactful user-focused solutions.

Courses

Front-End Development Track – Digital Egypt Pioneers Initiative (DEPI)

- Completed an intensive Front-End Development program covering:
- HTML5, CSS3, JavaScript (ES6+)
- React.js fundamentals and advanced concepts
- Responsive design and modern UI development
- Working with REST APIs
- Git & GitHub for version control
- Built multiple hands-on projects applying real-world front-end development practices.

Front-End Development – Route Academy

- Completed the Front-End track of the Full Stack Web Development course, covering:
- Front-End development using HTML, CSS, JavaScript, React.js, and Next.js
- Building dynamic web applications
- Applying clean code principles and best practices
- Developing practical projects to apply acquired skills

Technical Skills

- Languages & Markup: HTML5, CSS3, JavaScript (ES6+), Type Script
- Frameworks & Libraries: React.js, Next.js (App Router)
- Styling & UI: Responsive Design CSS Flexbox, CSS Grid
- Styled Components: Tailwind CSS Bootstrap, Sass
- Version Control & Tools: Git, GitHub
- APIs & Data Handling: REST APIs, Fetch API, Axios
- Additional Skills: Building reusable components Prompt Engineering
- Translating UI/UX designs into functional interfaces Performance optimization and cross-browser compatibility
- Programming Languages: Native PHP , OOP PHP , MVC . Databases: MySQL

Soft Skills

- Teamwork & Initiative: Contributed effectively in DEPI projects within diverse teams.
- Creative Problem Solving: Tackled real-world challenges with innovative solutions.
- Adaptability & Quick Learning: Quickly adapted to new tools and technologies in DEPI program.
- Effective Communication: Presented ideas and technical solutions clearly.
- Attention to Quality: Maintained high standards in code and UI/UX.
- Continuous Learning: Committed to ongoing skill development through DEPI and personal projects.

Education

"MIS" Management Information System Obour Institute. | 2019 – 2023 |
Final Project Grade "**Excellent**" , General Grade "**Good**"

Projects

E-Commerce Web App (Next.js)

- Developed a full-featured e-commerce application with modern architecture and scalable structure.
- Built using Next.js (App Router) with server-side capabilities
- Implemented authentication and session management using NextAuth
- Developed core features: cart, Wishlist, and checkout system
- Built dynamic routing for products, categories, and brands
- Managed global state using Redux Toolkit & Context API
- Structured project using services, actions, and interfaces (clean architecture)
- Integrated external REST APIs for products and orders
- Created reusable UI components with responsive design; added loading states and improved UX handling

Live Demo: e-commerce-omran2.vercel.app | **GitHub:** [omraan7/E-commerce](https://github.com/omraan7/E-commerce) | **Tech:** Next.js, React, TypeScript, Redux Toolkit, NextAuth

Social Media App (React)

Built an interactive social platform with authentication and real-time user interactions.

- Implemented CRUD operations for posts and comments
- Built authentication system (Login / Register / Change Password)
- Developed protected routes using custom Guards
- Managed global state using Context API
- Created UI features: modals, skeleton loading, follow suggestions
- Designed profile system and user interactions
- Structured project with reusable components and clean routing

Live Demo: social-app-omran2.vercel.app | **GitHub:** [omraan7/social-app](https://github.com/omraan7/social-app)

Movie & TV Explorer (React)

Developed a movie browsing application with dynamic data and reusable UI components.

- Integrated external API for movies, TV shows, and actors
- Built multiple dynamic pages (Home, Details, TV, Actors)
- Designed reusable components (cards, carousel, layout system)
- Managed state and lifecycle using React Hooks
- Responsive and optimized UI experience

Live Demo: movie-app-lovat-two.vercel.app | **GitHub:** [omraan7/movie-app](https://github.com/omraan7/movie-app)

NutriPlan (Oop js)

A web application that helps users track their daily nutritional intake.

- Home Page displaying a collection of 25 meals with filtering by category or region
- Meal Details Page showing full information including ingredients, preparation steps, nutritional values, and a Log This Meal button to add meals to the Food Log
- Food Log Page allows users to monitor daily consumption of protein, carbohydrates, fats, and calories
- Product Scanner lets users log additional products using names or barcodes
- Uses LocalStorage to store daily logs

Live Demo: omraan7.github.io/Nutriplan | **GitHub:** [omraan7/Nutriplan](https://github.com/omraan7/Nutriplan) | **Tech:** JavaScript, HTML5, CSS3, LocalStorage, REST APIs, OOP
